

## OBJECTIVE

To pass on knowledge and skills more efficiently and effectively

Besides being a learner yourself you are also **an expert having knowledge and skills** which are important to others. By sharing your knowledge and skills you design a learning experience for other learners, e.g. by presenting a topic to a team, showing something to an apprentice or intern, or sharing of best practices. There are simple tricks to create **a more efficient and effective learning experience**.

Ask yourself:

1

Can I enrich the learning experience by integrating **physical, tangible objects**, e.g. component, examples, products?

2

Can I create a **more visual** learning experience, e.g. by using sketches, pictures, infographics?

3

Can I design a **more emotional** learning experience, e.g. by invoking feelings such as pride, ambition, courage, confidence?

4

Can I enhance the learning experience by **gamification elements**, e.g. points, high-scores or levels?
